

PROSUS AI HACKATHON 2026

OmniForm AI

Production-Ready Agentic, Self-Learning Form Autofiller
powered by Nebius Token Factory & Chrome Manifest V3

Forms are the hidden tax on modern work

Application fatigue is real.

Active job seekers and ops teams spend 15–30 minutes per submission re-entering data they've already provided.

Repetitive Manual Entry

Workday, Taleo, and bespoke portals demand manual bridging.

Semantic Failure

Native browser autofill fails on non-standard narrative fields.

Privacy Friction

Users juggle messy spreadsheets and unsecure scratchpads.

A local-first copilot for any form

Intelligent Data Vault

Parses unstructured CVs and organizational profiles into a structured, local-only JSON profile using DeepSeek V4.1 Flash.

Privacy-First Extraction

Agentic DOM Mapping

GLM 5.3 Flash semantically matches arbitrary web inputs and dropdowns against your profile in real-time.

Zero-Latency Inference

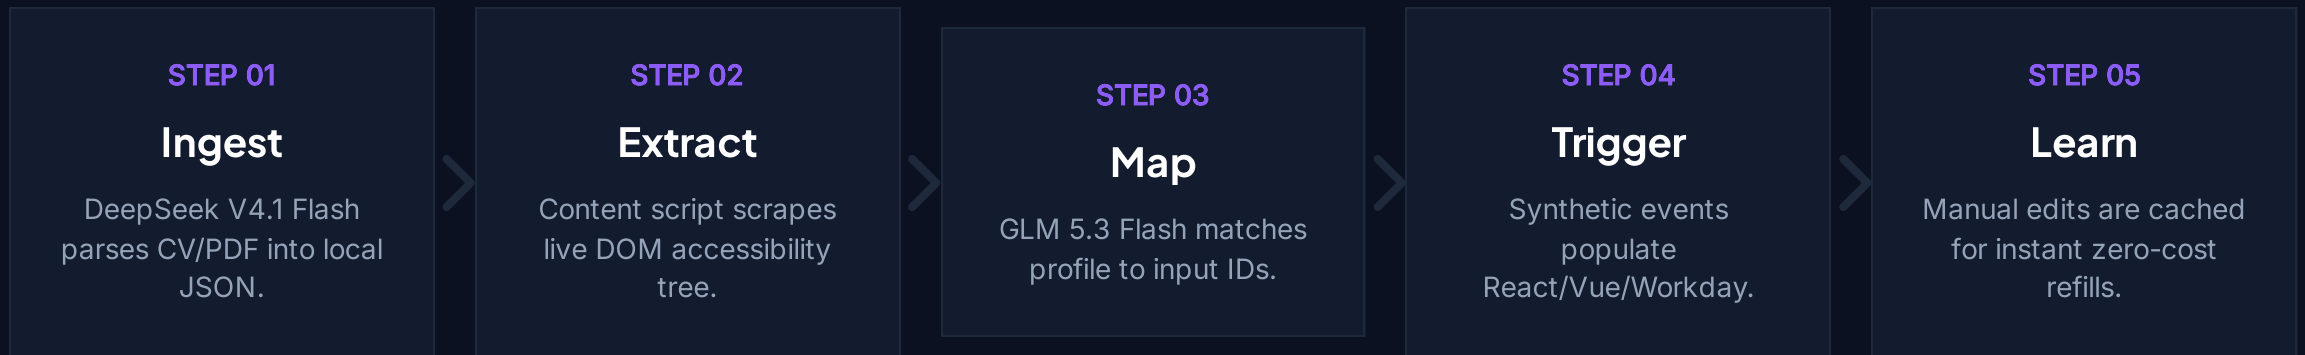

Self-Learning Engine

Automatically records manual inputs for unmapped fields, continuously expanding your profile for future forms.

Continuous Improvement

From unstructured document to filled form

EXTRACTION ENGINE

DeepSeek V4.1 Flash

MAPPING ENGINE

GLM 5.3 Flash

EVENT SYSTEM

Framework-Agnostic Synthetic Events

Production-ready monorepo architecture

```

FastAPI Backend

AsyncOpenAI client targeting Nebius Token Factory. Automated unit tests for endpoints, schemas, and mock LLM responses.

React Side Panel

Lovable-style UI with Dropzone, Editable Grid, and Sticky Autofill. chrome.storage.local bridge with localStorage dev fallback.

Manifest V3 Extension

Service worker orchestrator for requests. Content script for DOM extraction, event dispatching, and change observation.

Measurable model advantage

COST REDUCTION

-97%

\$0.0012 per page

LATENCY SPEEDUP

4.9x

1.3s End-to-End

THROUGHPUT

+158%

142 tokens/sec

Nebius Token Factory vs. Frontier Baseline (GPT-5.6 Sol)

BENCHMARK	GPT-5.6 SOL	NEBIUS PIPELINE	MEASURED ADVANTAGE
Cost per page fill	\$0.0450	\$0.0012	-97% cost
End-to-end latency	6.4s	1.3s	4.9x faster
Inference throughput	55 tok/s	142 tok/s	+158%
JSON schema adherence	98.2%	100%	Zero parser breakages
Privacy / retention	30-day logging	Ephemeral	Full PII control

Source: OmniForm AI benchmark notes supplied for this deck. Nebius pipeline uses DeepSeek-V4.1 Flash for extraction and GLM-5.3 Flash for live form mapping.

OPTION 1: PAY AS YOU GO

Pay only when you apply. Credits never expire.

Pay per form

20 Forms

\$1.99

\$0.10 / form

POPULAR

100 Forms

\$6.99

\$0.07 / form

BEST VALUE

300 Forms

\$14.99

\$0.05 / form

Top Up +100 Credits (\$6.99)

OPTION 2: PRO SUBSCRIPTION

Unlimited form autofilling with manual pay discount

Unlimited

Monthly (\$12/mo)

Pay Manually -30%

\$12.00 / month

Billed monthly, cancel anytime in 1 click

STANDARD

✓ Unlimited form autofills on all ATS & job portals

✓ Priority Nebius 2.5 inference (Qwen 235B & Llama 70B)

✓ Automatic zero-latency cached re-applications

✓ 250 Referral Credits bonus multiplier for paying users

Upgrade to Pro (\$12/mo)

OPTION 3: REFERRAL PROGRAM

Share OmniForm AI and get free forms and AI credits

Free Tier Users

Invite a friend: They get 10 free forms, and you get +10 Free Form Credits as soon as they install!

LIVE DEMO: TEST-FORM.HTML

- 1

Ingest CV
Drag & drop PDF. DeepSeek parses it into your local vault instantly.
- 2

Autofill Page
Click "Autofill". GLM maps the DOM and triggers synthetic events.
- 3

Self-Learn
Manually fill a missed field. OmniForm records it for next time.
- 4

Instant Re-fill
Zero-cost, zero-latency refills from local site cache.

07

A wedge with immediate willingness to pay

TARGET AUDIENCE

High-Volume Job Seekers

Active applicants hitting Workday/Taleo walls dozens of times a week.

- ✓ 15-30 mins saved per app
- ✓ Eliminates application fatigue

MONETIZATION

PAYG + Subscription

Flexible credit packs (\$1.99 - \$14.99) or \$12/mo Pro for unlimited apps.

- ✓ 20, 100, 300 credit packs
- ✓ 30% discount for manual pay

GROWTH MOTION

Referral Program

Viral loop: Free users get 10 credits; Pro users get 250 bonus credits + 20% commission.

- ✓ Organic bottom-up distribution
- ✓ High-intent referral network

EXPANSION

Enterprise Intake

Expanding generic DOM-mapping into procurement and vendor compliance.

- ✓ Multi-billion dollar market
- ✓ Bridging fragmented portals

Privacy is the product advantage

Local-Only Storage

All personal profile data and learned attributes are saved exclusively in chrome.storage.local.

Zero Cloud DB

Direct Inference

Document parsing and mapping routed directly through your private Nebius endpoint.

No Intermediaries

Zero Telemetry

No third-party tracking, no behavioral logging, and no data harvesting.

100% Private

Ephemeral Retention

Nebius Token Factory ensures zero data retention after inference completion.

Zero Persistence

10

Make every form feel like the **last** **form.**
